Brad – Please note that the verification of the QA pages/info is also being addressed through other sources so it turns out there is no need for you to respond to this email at this time. Will let you know later if we do need any additional information from you.

Thank you!

Diane H.

Brad – As part of the web update movement, they are consolidating all QA pages/info into one and we have been asked to verify what current QA content needs to remain and our list includes two QA documents related to West Lake Landfill. As the current project manager, could you let me know if 1) these need to be kept on the QA site and if so, the intended audience?
